

Certified OSHA Training

SafetyFIRST[®]

The Kell High School Robotics Team in partnership with the Georgia Tech Research Institute and General Electric is hosting a safety training course.

This course is an OSHA 10-Hour General Industry Safety Course.

Participants will be able to earn an official OSHA 10-Hour Certification.

In order to earn this certificate you must attend both full training sessions.

The course will be conducted at Kell High School December 1st and 8th.

Each session will consist of 6 hours of training.

Lunch and refreshments will be provided.

Seating is limited. Register now to reserve your seat in this session.

This is offered at **NO COST** to local **FIRST** participants.

This is an opportunity for team members and mentors to receive professional training.

Topics include Electrical, Hazard Communication, Personal Protective Equipment, Industrial Hygiene, Exit Route and Fire Protection, Walking and Working Surfaces, Machine Guarding, Bloodborne Pathogens, Ergonomics, and more.
