

water

Right now more than 1.1 billion people in the world, mostly in developing nations, do not have access to safe water.

Of the 42,000 deaths that occur every week from unsafe water and a lack of basic sanitation, 90% are children under 5 years old.

The Kell Robotics Team has partnered with charity:water to help provide funding to construct and rehabilitate freshwater wells in Africa.

100 % of funds collected go toward this effort.

You can help us.

With proper funding, continued development of sustainable water systems will save lives and transform communities.
